**Complete information
always at hand**

MyInfo is the key part of the entertainment-info-domotic system on board the yacht which enables you to perform various tasks and visualize the information you need on the screen of your iPad, iPhone or Apple TV. With MyInfo, the most demanding services are combined and displayed anywhere, anytime, easily.

Nautical map control interface

Navigation control interface

CCTV

allows the visualization of cameras around the yacht in any moment directly from the display of your TV, iPad or iPhone.

NMEA Data

provides you with the most important information related to navigation: speed, water temperature, direction, position, latitude, longitude and time.

Charting

allows you to make use of the cartography and explore the maps on your TV, iPad or iPhone.

Track & View

enables you to check the route of the yacht in the last 12 and 24 hours. Furthermore, the "Seagull" feature allows for real time viewing of the boat in 3D. If the Owner is far from his yacht, he will have the chance to view it whenever he chooses.

3D Info Service

is a 3D chart that will show you the current position of your yacht together with the closest points of interest such as restaurants, shops, sights etc.

**Comfort & Leisure
at your fingertips**

Videoworks supplies the design and the integration of a fully integrated system that enables the final user to manage, in an intuitive, easy and customized way:

Air conditioning
(To set the desired temperature in each area)

Curtains
(Open/close curtains and raise and lower shades or blinds)

Scenarios and Atmospheres
(Totally customizable)

Lights
(On/off and dimming)

Entertainment
(Easy access to your favorite movies and music libraries, games and multimedia contents)

Main menu interface

**The future of onboard
technology**

Ask Alexa to switch on the lights before getting out of bed, turn down the temperature while reading in your favorite chair, control your entertainment system or dim the lights from the couch to watch a movie, all by just using your voice. Videoworks is now able to implement voice commands into its systems for a unique and seamless experience.
